We've been busy here at XML Press this month, with four new books, covering the gamut from Webinars to TWiki wiki to technical writing fundamentals to DITA.

Contents

- 8 Steps to Amazing Webinars
- Information Design Using TWiki
- The Insider's Guide to Technical Writing
- DITA for Practitioners Volume 1: Architecture and Technology

8 Steps to Amazing Webinars

Sharon Burton's popular eBook, *8 Steps to Amazing Webinars*, is now available in a print edition. This easy-to-read book is full of tips and tricks to help make your webinars more effective.

Information Design Using TWiki

Combining real-world experience with a veteran teacher's ability to communicate, Phil Gochenour's *Information System Design Using TWiki*, builds an information system step by step, using the TWiki wiki platform.

The Insider's Guide to Technical Writing

In 2001, Krista Van Laan published *The Complete Idiot's Guide to Technical Writing* with Catherine Julian. *The Insider's Guide to Technical Writing*, is inspired by that book, but is significantly re-written, extended, and brought up to date. This is the perfect book for someone who is thinking about becoming a technical writer or just starting out in the profession.

DITA for Practitioners Volume 1: Architecture and Technology

Take a deep dive into DITA with Eliot Kimber. In the first of his two-volume series, *DITA for Practitioners Volume 1: Architecture and Technology*, Kimber provides a detailed look at DITA aimed at engineers, tools builders, and content strategists – anyone who designs, implements, or supports DITA-based systems.
